TABLE OF CONTENTS

Team

Our team consists of individuals that come from different types of backgrounds in the cryptocurrency space we have members in the field of marketing, e-commerce, Insurance Worker, web development, development and people who understand the trends and economics of the defi space!

Our unique array of skills and shared passion for cryptocurrency has enabled us to build a project that will be working towards the goal of a DeFi insurance they will save the funds from each holders

Why FlokiSave?

Taste the flavor of not being scammed anymore on the BSC.

FlokiSave was created out of the annoyance of these new insanely scams projects are plaguing the DeFi space
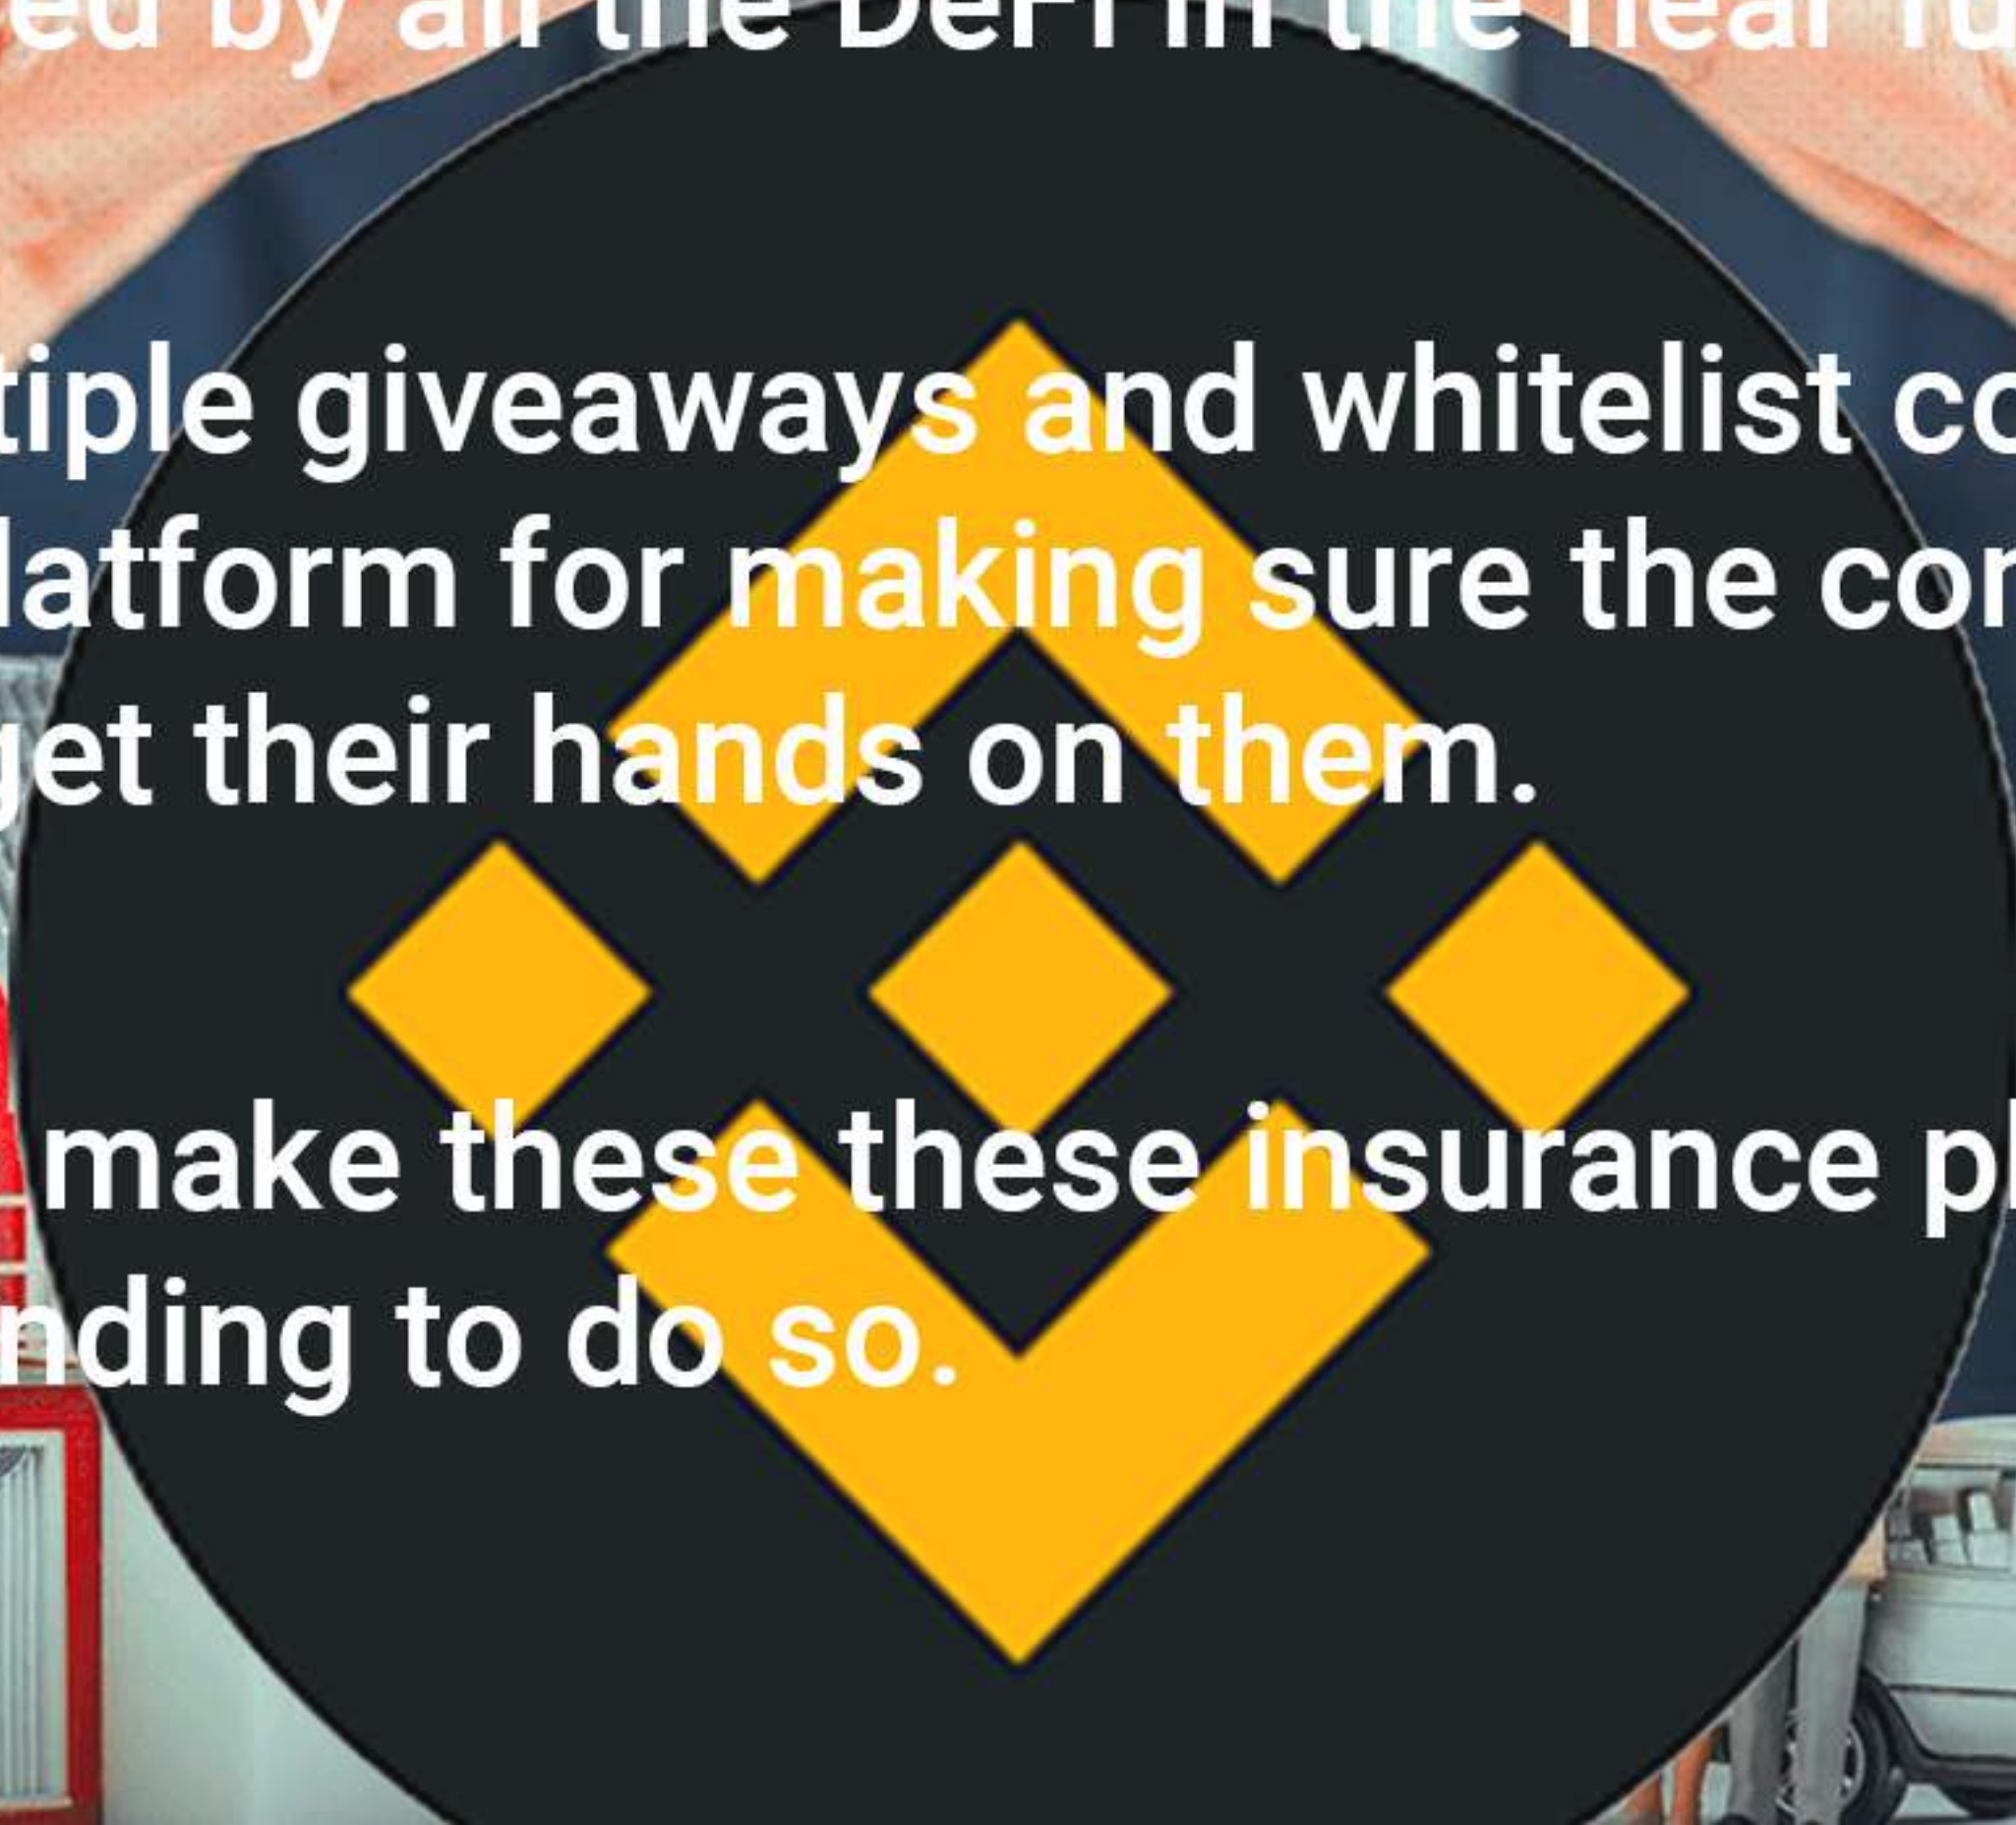

We want to give investors/traders the opportunity to be able to invest into a project and not instaly be at a loss, we belive this gives investors confidence that their bag will grow and that you're getting what you paid for.

Insurance Platform.

We will be creating the first insurance platform on the DeFI these will be getting used by all the DeFi in the near future.

We will be running multiple giveaways and whitelist competitions before we launch the platform for making sure the community has a lot of opportunity to get their hands on them.

We plan to complete to make these these insurance platform once we have all the funding to do so.
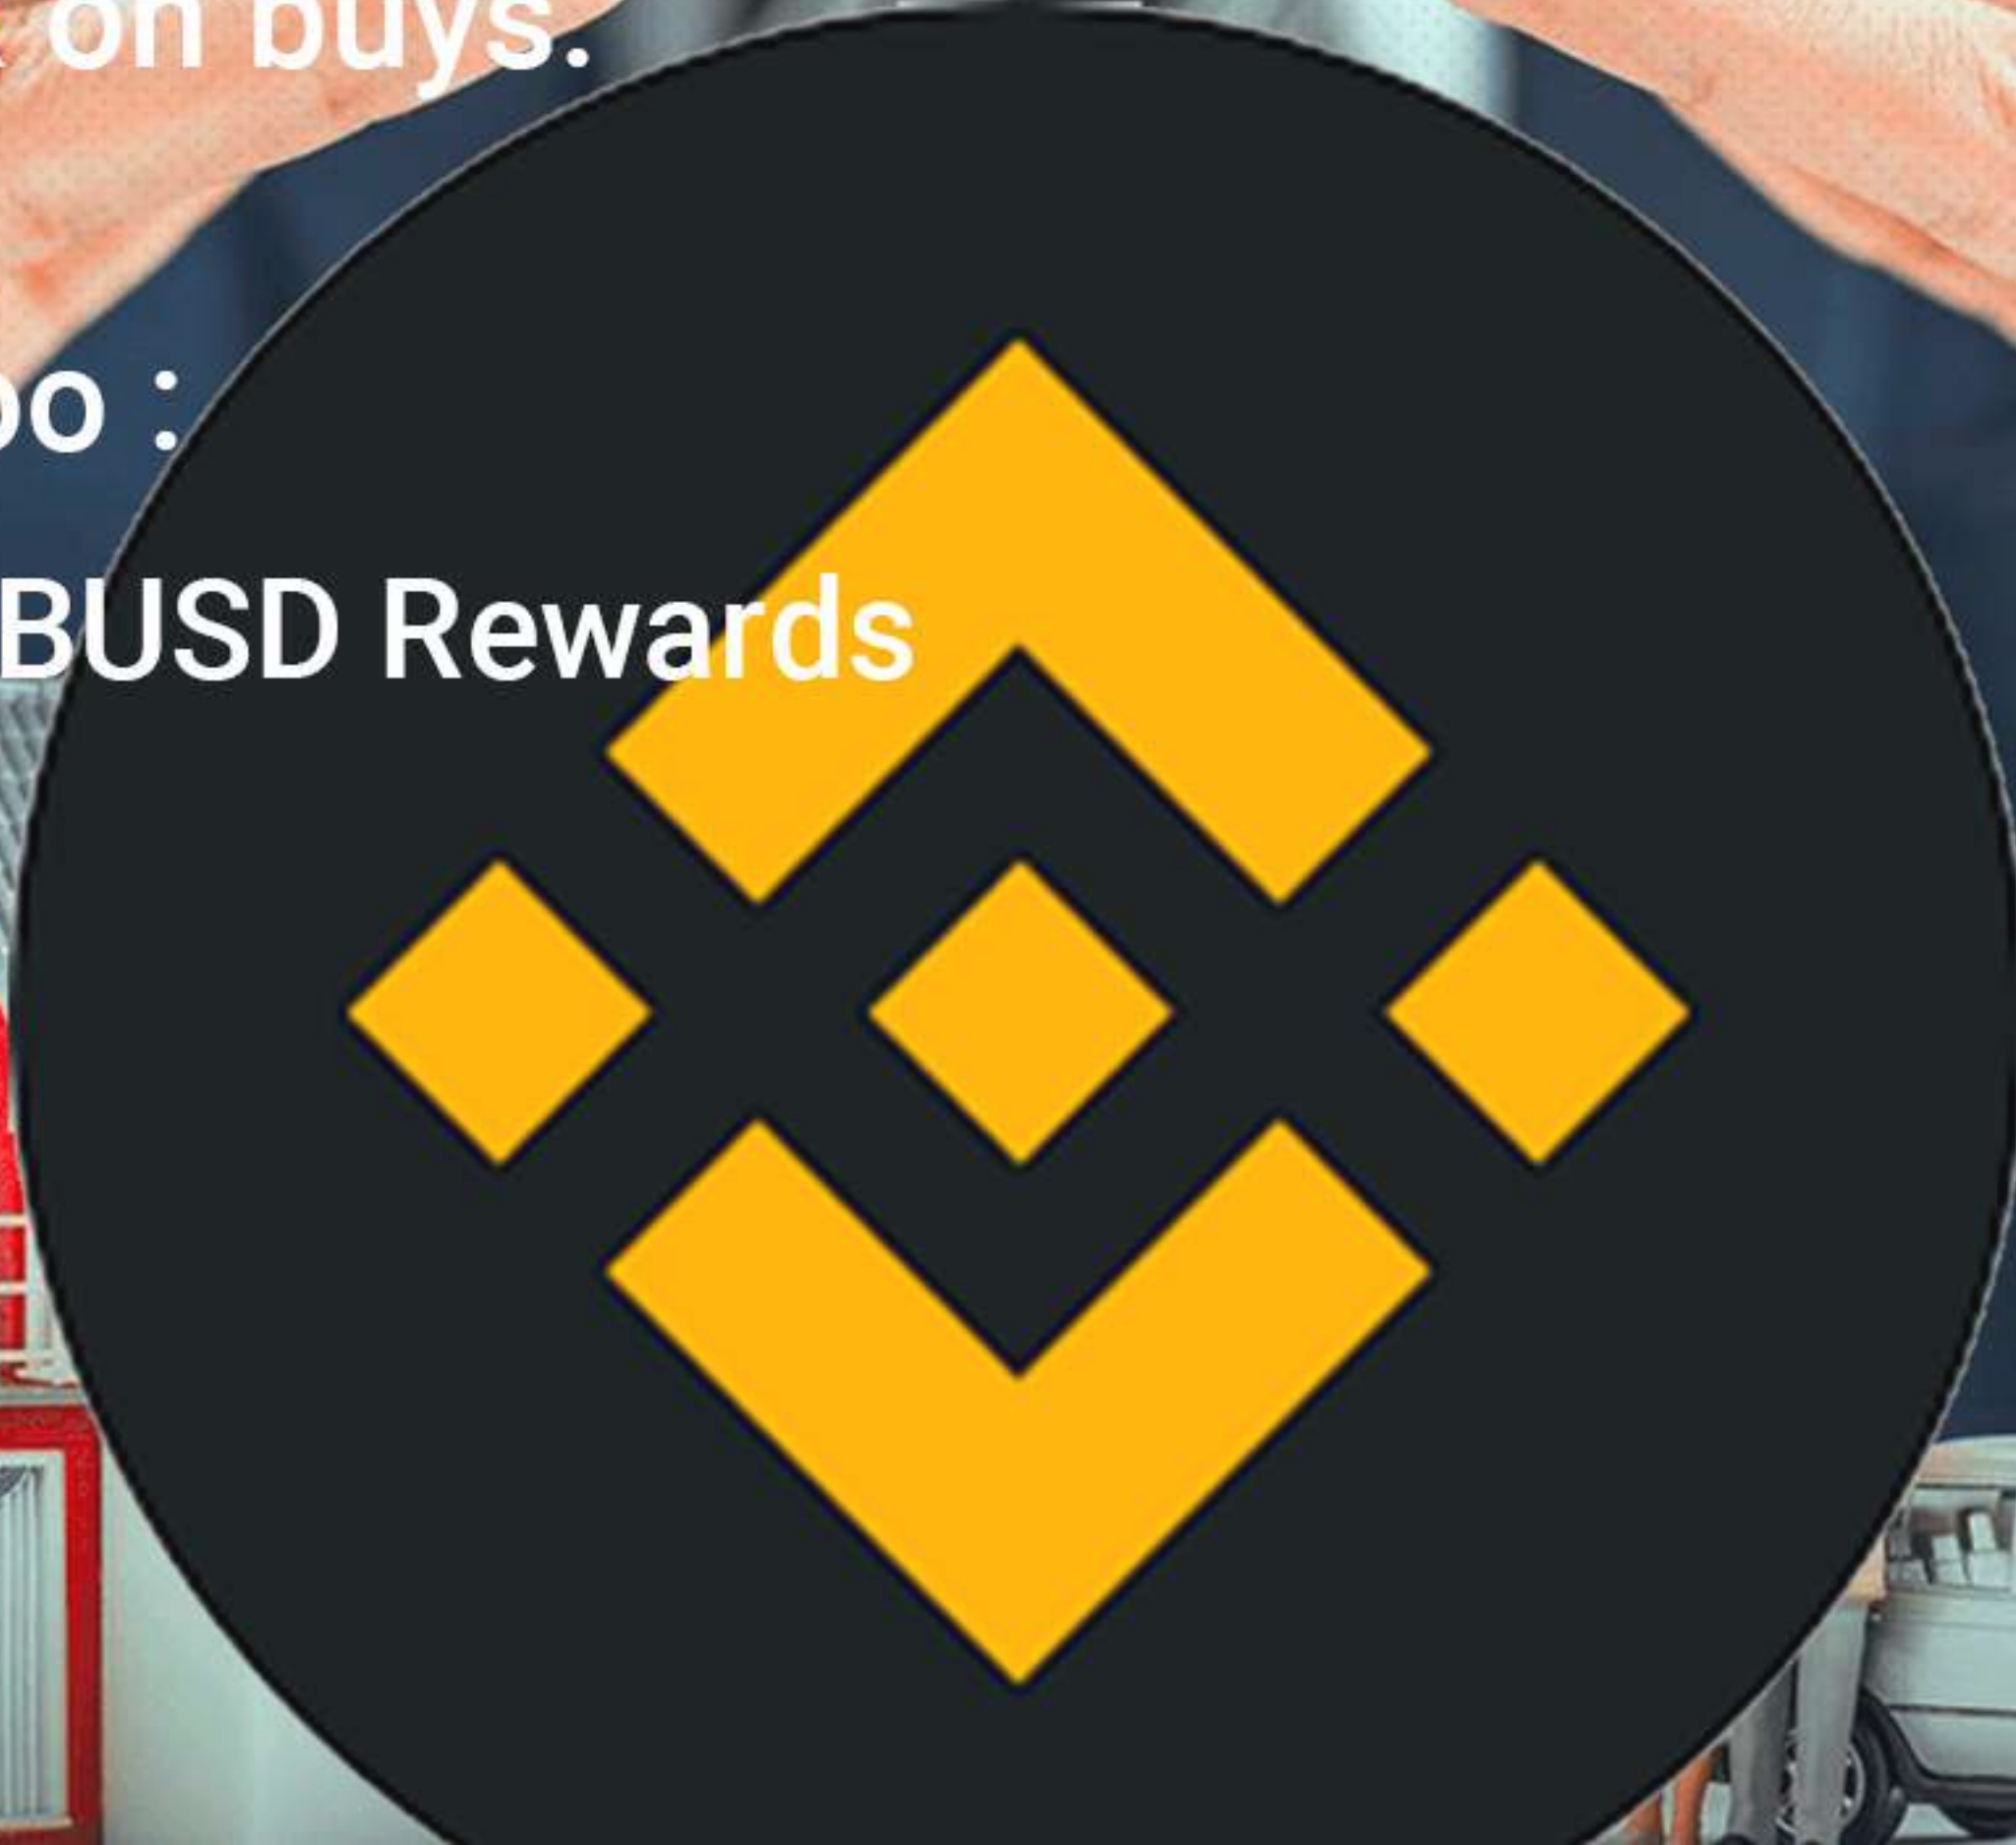

Tokenomics.

FlokiSave has quite unique tokenomics in this current DeFi space we have 15% tax on buys.

On Sells there is 15% too :

- 6% fee towards your BUSD Rewards
- 1% Development
- 5% Insurance Funds
- 2% Marketing Fees
- 1% Liquidity Pool

Security.

Locked Liquidity

- Initial liquidity will be locked for a minimum of 6 months. This provides holders with assurance that their tokens can always be traded.

Contract Audit

- The team will purchase an audit with DESSERT FINANCE. Our Dev of the project will be fully doxxing to this company to ensure the security of the project. This will deter dishonest practices by the team; otherwise the doxxed information will be released to the public.

Extra Features.

Anti Whale features.

- To prevent whales causing too much volatility we have added in to our contract a max wallet.

Listings.

- We will launch on PCS and we will eventually be listing on multiple Centralised exchanges once we have made enough capital to complete do so.

Buybacks System.

- We have a buyback system, we will use it only if our anti-bots detect bots after detected the bot all the bot wallet get burned to create a huge green candle and increase the value of the token, According to the logic all tokens will be burned 2-3 minutes after the launch so be on the lookout and get your tokens as soon as possible! !
